

MACH ACADEMY, INC.

Successful students Our Greatest Achievement

**Helping Youth Succeed Through
Mentoring Academics Computers Healthy Recreation**

Volunteers are needed to.....

Provide academic support through homework assistance and skill building opportunities; reading and writing activities to encourage participants to become confident readers through a variety of fun learning literacy activities; stimulating math and science activities to encourage and increase interest and skill levels in these areas; enrichment/disguised learning activities through college planning, career exploration activities as well as through chess and CODING clubs. Help infuse STEM and computer learning sessions into program offerings to help participants prepare for success in our highly technical world.

Provide and promote rigorous exercise and physical fitness activities for participants and families. The world of tennis/fitness helps children stay physically fit, develop discipline, learn how to compete, develop social skills, earn college scholarships, travel Locally, Nationally and internationally, learn how to win graciously and how to lose with honor.

Expose participants to the lifetime sport of tennis in a success-oriented and friendly environment. Make the “game of tennis” accessible to participants through giving them the opportunity to belong to Tennis club, participant in Tennis Play Days, play on a USTA Junior Team Tennis Team, Junior Tennis Tournaments and eventually on their high school tennis teams. Encourage participants to use the game of tennis to help pave the way for tennis college scholarships.

Provide the nationally recognized USTA NJTL First Serve Life Skills and ACE academic curriculum to emphasize and encourage positive character development, a sense of belonging and personal achievement. Provide positive interaction activities and promote social skills development through team building and tennis fitness. Help to increase self-esteem, awareness and personal confidence levels through prevention sessions. Help participants see the connection of Education to Tennis.
